Top Ten Ways to Help Pollinators:

Think twice about getting a hive of honeybees

On the island of Ireland, we have one honeybee species, and it is not in decline. Most honeybees are 'domesticated pollinators', living in hives and managed by beekeepers. Our 100+ wild bee species are under threat. If we have too many honeybee hives in the landscape, they can compete for food with our struggling wild pollinators. You should only get a honeybee hive if you want to start a new hobby, but it is not the best thing to do for biodiversity.
